Work Experience

LOGICLOOM IT SOLUTIONS, Pune Maharashtra

July 2025 – Present

SOFTWARE DEVELOPER

Frontend Development

- Built **React.js** applications with authentication, protected/public routes, **React Context**, and **role-based access control** across multiple projects. Developed a **configurable form builder** supporting **15+ field types**, validation rules, and **API-driven dropdowns**.
- Worked on **business applications** including **School internet management**, **Canine Insight**, and **inventory systems**, implementing CRUD, filters, responsive UIs, and **API-driven interactive dashboards**.

Performance & Feature Development

- Developed a custom DayPilot, featuring **machine-wise scheduling**, **infinite scrolling** of **5-month sliding window**. Improved rendering performance for **1,000+ scheduling cells** with **HTML Canvas**, resulting in smoother scrolling and **reduced UI lag** by **~50%**.
- Managed client-side state based on API responses with proper loading and conditional rendering, improving overall user experience. Built dynamic **listings** with **search**, **custom filters**, server-side **pagination**, and **CSV exports**

Backend & Database

- Integrated **REST APIs** and implemented **CRUD** operations using **Node.js**, **Express.js**, **PostgreSQL**, and **Sequelize ORM**.
- Developed authentication, **custom middleware**, and **role-based authorization** for secure access to application data. Worked with PostgreSQL to build optimized queries, **pagination**, and **filtered** data retrieval for large datasets.

Education

KJ's Institute Trinity College of Engineering and Research

(Affiliated to Savitribai Phule Pune University)

Bachelor of Engineer in Information Technology (8.30 CGPA) Top 5% in Academics

Higher Secondary **88.33%** | Secondary School **79.00%**

August 2021 - June 2025

Maharashtra, India

Maharashtra, India

Technical Skills

- DevOps Tools** : AWS, Docker, Kubernetes, Terraform
- Libraries / Frameworks** : ReactJs, NextJs, NodeJS, ExpressJs, TailwindCSS, React Context,
- Languages and Databases** : MongoDB, PostgreSQL, C++, JavaScript, Typescript, HTML5, CSS3
- Other Skills** : Object Oriented Programming (OOP), Problem Solving, Data Structures and Algorithms, Git

Projects

Self-Help Group Financial Management System | *MERN Stack, Prisma, PWA*

Developed a **Progressive Web Application** for a **50+ member SHG**, digitizing savings, loans, repayments, interest, penalties, and transactions. Improved **financial transparency** through centralized member records, transaction history, and reports. **Reduced manual bookkeeping** by automating monthly calculations, balances, and loan tracking. Implemented **RBAC and authentication** for secure member and admin access.

Deployment of 3-tier web app | *AWS | Github*

Created EC2 instance using **Terraform**. Maintained 3-tier application using **Elastic Kubernetes Cluster**. **Containerized** web application using **Docker**. Created Pods using **Kubernetes** orchestration for auto scaling. Reduced **downtime** by **~65%**, improved **uptime** by **~99.5%**. Scalable up to **10,000 concurrent users**.

Prompts Book | *MERN stack | [Live Link](#) | Github*

Developed web app using **NextJs**, users can **Create Posts** and add **Stories**. **Authenticated** users can put **Likes**, **Comments** and **Share** the posts through integrated Real-Time Chat Application programmed using **Web-Sockets**. Processed by **30+ API routes**, maintained database using **MongoDB** and **NodeJS**, styled using Tailwind CSS. Deployed on **Vercel**

Sorting Visualiser | *[Live Link](#) | Github*

Built Sorting Visualiser, visualises inner working of **6 main sorting algorithms**, supports **controls** like **speed of visualisation** and **size of array**
