Experience

Software Developer — LogicLoom IT Solutions, Pune, Maharashtra

Jul 2025 – Present

- **Frontend:** Built **React.js** applications with authentication, protected/public routes, **React Context**, and **role-based access control** across multiple projects. Developed a configurable **form builder** supporting **15+ field types**, validation rules, and API-driven dropdowns.
- Worked on business applications including **School Internet Management**, **Canine Insight**, and **inventory systems**, implementing CRUD, filters, responsive UIs, and API-driven interactive dashboards.
- **Performance:** Developed a **custom DayPilot** scheduler featuring machine-wise scheduling and infinite scrolling of a 5-month sliding window. Improved rendering of **1,000+ scheduling cells** with **HTML Canvas**, resulting in smoother scrolling and **reduced UI lag by ~50%**.
- Managed client-side state based on API responses with proper loading and conditional rendering. Built dynamic listings with **search**, **custom filters**, **server-side pagination**, and **CSV exports**.
- **Backend:** Integrated **REST APIs** and implemented CRUD operations using **Node.js**, **Express.js**, **PostgreSQL**, and **Sequelize ORM**.
- Developed **authentication**, **custom middleware**, and **role-based authorization** for secure access to application data. Built optimized **PostgreSQL** queries, pagination, and filtered data retrieval for large datasets.

Skills

- **DevOps / Other Tools:** AWS, Docker, Kubernetes, Terraform, Postman
- **Libraries / Frameworks:** React.js, Next.js, Node.js, Express.js, TailwindCSS, React Context
- **Languages and Databases:** MongoDB, PostgreSQL, MySQL, JavaScript, TypeScript, HTML5, CSS3
- **Other Skills:** Object Oriented Programming (OOP), Problem Solving, Data Structures and Algorithms, Git, GitHub Actions

Projects

Self-Help Group Financial Management System — MERN Stack, Prisma, PWA

- Developed a **Progressive Web Application** for a **50+ member SHG**, digitizing savings, loans, repayments, interest, penalties, and transactions.
- Improved financial transparency through **centralized member records**, transaction history, and reports.
- Reduced manual bookkeeping by **automating monthly calculations**, balances, and loan tracking.
- Implemented **RBAC and authentication** for secure member and admin access.

Deployment of 3-Tier Web App — AWS [Github](#)

- Created **EC2 instance using Terraform**; containerized the web application using **Docker**.
- Maintained the 3-tier application on **Elastic Kubernetes Service**, creating Pods with **Kubernetes** orchestration for auto scaling.

Prompts Book — MERN Stack [Live Link](#) — [Github](#)

- Developed a web app using **Next.js** where users can create posts and add stories; authenticated users can like, comment, and share posts through an integrated **real-time chat** built with **WebSockets**.
- Served by **30+ API routes**, with data maintained using **MongoDB and Node.js**, styled with **Tailwind CSS**, and deployed on **Vercel**.

Sorting Visualiser [Live Link](#) — [Github](#)

- Built a visualiser showing the inner workings of **6 major sorting algorithms**, with controls for **visualisation speed** and **array size**.

Education

KJ's Trinity College of Engineering and Research, Pune
B.E. in Information Technology **CGPA: 8.30**
Higher Secondary Certificate (HSC), **88.33%**
Secondary School Certificate (SSC), **79.00%**
